PHYSICA A

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/EI Compendex Plus/Engineering Index/INSPEC

Volume 250, Nos. 1–4 **15 February 1998**

Contents

Random systems

Modified scaling relation for the random-field Ising model
U. Nowak, K.D. Usadel and J. Esser 1

Quantum phase transition in spin glasses with multi-spin interactions
T.M. Nieuwenhuizen and F. Ritort 8

Tempering simulations in the four dimensional $\pm J$ Ising spin glass in a magnetic field
M. Picco and F. Ritort 46

Fluids, solids, interfaces and supramolecular fluids

Thermomechanical properties of the WCA-Lennard–Jones model system in its fluid and solid states
S. Hess, M. Kröger and H. Voigt 58

Universality in the critical dynamics of fluids: ultrasonic attenuation
J.K. Bhattacharjee and R.A. Ferrell 83

Entropy versus correlations in simple fluids. The gas–liquid and freezing transitions
P.V. Giaquinta, G. Giunta and G. Malescio 91

Propagation of short-range order in the lattice gas
Y. Oota, T. Kakiuchi, S. Miyazima and T. Tanaka 103

Structure and film formation in charged emulsions and microemulsions
D.N. Petsev 115

Generalization of the Williams–Landel–Ferry equation
L. Dagdug and L.S. García-Colín 133

The viscosity of a moderately dense suspension of particles with piece-wise constant potentials of interaction
E. Wajnryb and J.S. Dahler 142

Coupled Hamiltonians and three-dimensional short-range wetting transitions
A.O. Parry and P.S. Swain 167

Dynamical processes

Dynamic numerical models of stock market price: from microscopic determinism to macroscopic randomness
A.-H. Sato and H. Takayasu 231

Simultaneous Brownian motion of N particles in a temperature gradient
J.M. Rubí and P. Mazur 253

Fokker–Planck and non-linear hydrodynamic equations of an inelastic system of several Brownian particles in a non-equilibrium bath
J.-E. Shea and I. Oppenheim 265

Contents continued inside

PHYSICA A
Volume 250, Nos. 1–4 **15 February 1998**

Contents (continued)

Linear stochastic dynamics with nonlinear fractal properties
D. Sornette 295

Aging in the linear harmonic oscillator
L.L. Bonilla, F.G. Padilla and F. Ritort 315

Are random walks random?
J. Nogués, J.L. Costa-Krämer and K.V. Rao 327

Random walk on the prime numbers
M. Wolf 335

Correlation function studies on the Domany–Kinzel cellular automaton
T.F. Nagy, S.D. Mahanti and C. Tsallis 345

A hierarchical scheme for cooperativity and folding in proteins
A. Hansen, M.H. Jensen, K. Sneppen and G. Zocchi 355

Mathematical statistical physics

Corrections to finite-size-scaling in two dimensional Potts models
J.-K. Kim and D.P. Landau 362

Critical temperature in the two-layered Ising model
A. Lipowski 373

The spin-$\frac{1}{2}$ transverse Ising model with four spin interactions
B. Laaboudi and M. Kerouad 384

Summation of series in statistical mechanics by continued exponentials
D. Poland 394

One-loop-dimensional reduction of the linear σ model
A.P.C. Malbouisson, M.B. Silva-Neto and N.F. Svaiter 423

Stability of the non-radial eigenmodes of a uniformly charged elastic globe
S. Bastrukov and D. Podgainy 435

On the mean-field theory of magnetic multilayers with bilinear and biquadratic Heisenberg exchange
S. Lazarev, M. Škrinjar, D. Kapor and S. Stojanović 453

Cooperative phenomena in non-Heisenberg spin model with two- and three-atom interactions
S.N. Mitra and K.G. Chakraborty 470

Renormalization group study of Mullins' equation for molecular beam epitaxy with conserved noise
P.-M. Lam and D. Bagayoko 495

Dielectric response in Bloch's hydrodynamic model of an electron–ion plasma
K. Ishikawa and B.U. Felderhof 506

Discrete anchoring: Bulk-substrate coupling in lattice models
C.E. Paraskevaidis, P.L. Taylor, B.M. Mulder and C. Papatriantafillou 517

Goldberg's theorem and the Baker–Campbell–Hausdorff formula
H. Kobayashi, N. Hatano and M. Suzuki 535

Cumulative author index of Volumes 241 to 250 549

Index of authors and paper to Volume 250 556
